

Using Zoom to Record a Presentation

Why use this

[Zoom](#) is a virtual conferencing tool. In addition to hosting and recording meetings, Zoom can be used to record and share a presentation. [Watch this example of a video presentation created using Zoom](#)

1. Go to <https://csusm.zoom.us/> and download the program.
2. Open the Zoom program

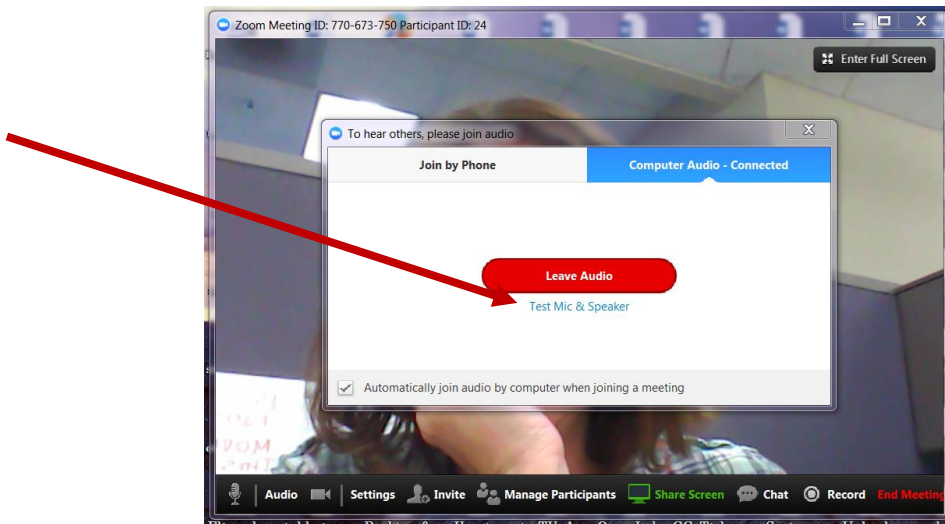

3. In the Zoom window, click on the **Start with Video** button

4. It will open Zoom with your video camera turned on

5. On the bottom left, click on the **Audio** button to test your mic and speaker

6. Open the PowerPoint Presentation
7. Click to Share Screen **Share Screen** button

8. Select the PowerPoint presentation window and click on the **Share Screen** button

9. You will see your screen appear with green around it

10. Roll your mouse over the top if the screen where you see a green button

11. Roll over to the three dots above **More** then choose **Start Recording** for the list

12. Use the down arrow to advance your slides as you present your presentation

13. When you are finished, roll your mouse over the top of your screen where you see a green button

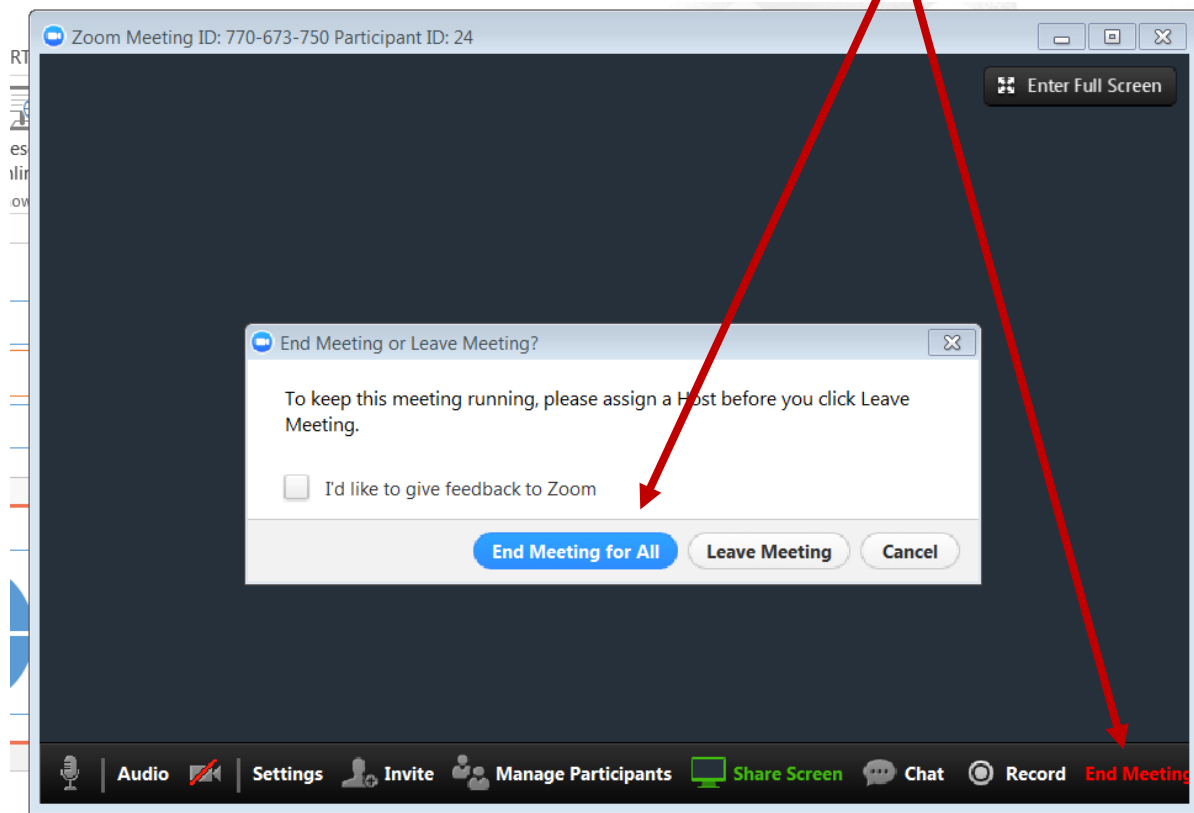

14. Roll over the three dots above **More** and choose **Stop Recording** from the list

15. Click on the **Stop Share** button

16. You will be taken back to the Zoom meeting window
17. On the bottom right, click on the **End of Meeting** button
18. Click on the **End Meeting for All** button

19. You will see a box saying the video is being processed

20. Once it finishes, a folder will open with several files
21. Upload the largest file size (probably called zoom_O.mp4) to YouTube

Tip: Refer to the Student How-To guide for uploading videos to YouTube and make sure you add your video as **unlisted** and not private.
